SUMMARY:

- MERN Stack Developer with 1.5 years of experience in Node.js and React.
- Proficient in frontend and backend technologies, including Next.js, Node.js, and MongoDB.
- Experience in integrating RESTful APIs and create responsive, user-friendly designs.
- Adept at creating reusable components and optimizing applications for performance and user satisfaction.

SKILLS:

- Programming Languages: JavaScript | TypeScript | HTML | CSS
- Frameworks & Libraries: Next.js | React | Redux | Tailwind CSS
- Backend & Database: MongoDB | Prisma | Node.js | JWT (JSON Web Tokens)
- Other Tools: Git | Linux | VsCode | Postman

WORK EXPERIENCE:

Fi Ellements

Associate Software Engineer | 21 February 2022 - 11 August 2023

- **Technical Support:** Provided responsive technical support across multiple projects to ensure high levels of user satisfaction and retention.
- **Design Collaboration:** Worked closely with designers and product managers to translate Figma wireframes into pixel-perfect, mobile-first designs.
- **API Integrations:** Conducted RESTful API integrations across multiple projects, enhancing software functionality and enabling seamless interactions with external services.
- **Cross-Browser Compatibility:** Ensured cross-browser compatibility and responsive design across various web applications.
- **Intern Guidance:** Took on the responsibility of guiding interns, providing mentorship and support in their professional development.
- **Project Contributions:** Helped create **5 software projects** successful, showing flexibility and ability to work in different areas.

EDUCATION:

Lovely Professional University (Punjab)

B.Tech in Computer Science | 2018 - 2022

PROJECTS:

PlantsZen: E-commerce Platform for Plants

Nextjs, TypeScript, MongoDB, Node.js, React

- Developed a platform enabling users to browse and purchase plants, featuring user accounts, plant categorization, and personalized preferences.
- **Database Design and Implementation:** Database structure to efficiently store plant information, user data, and categories.
- **Backend:** Manage user authentication, plant retrieval, and category management through welldefined API endpoints.
- **Frontend:** To craft a visually appealing and user-friendly interface, ensuring a seamless user experience.
- Admin Panel: Created an admin panel for streamlined plant and category management.
- Project Link: <u>https://plantszen.nosang.in</u>

Piclogue: Social Media Platform

Nextjs, TypeScript, Prisma, Tailwind CSS

- Built a social media application where users can post images, share thoughts, and follow other users.
- **Performance Optimization:** Implemented infinite scroll with **React Query** for enhanced user experience and efficient content browsing.
- Project Link: <u>https://piclogue.nosang.in</u>
